

CMO450J - Paul

Hi, my name is Paul and this is Jenny, my 1st ever Morris Minor. She is a 1971 2 door saloon and I purchased her on Jan 10th. Unfortunately there was no historical paperwork so don't know much about it's history.

Window rubbers leak like a sieve, and the brakes were almost non-existent on the drive home from Salisbury to Swindon which made for an interesting drive home 😊

I removed the sodden carpets as soon as I got home and was really pleased to find solid floors. It has had some welding under the wheel arches and will need some patching in the front corners of the tie panels but apart from that it looks pretty solid.

My plan is to finish replacing brake cylinders, shoes, and drums all round. I have done the front brakes at the moment and there is already some improvement.

Then I am going to get an MOT just to make sure that there is nothing dangerous that needs attention and then sort the window rubbers and general TLC.

I don't have a workshop so repairs are weather dependent on my drive and a bit like cricket 'rain stops play'

I purchased the car to use as a fun 'runaround'. The intention is to tidy it up, keep it well serviced, use it as much as I can, and go on some of the rallies and get together.
